Procedures for Submitting Design Review Applications

As stated in the Design Standards, pre-approval is required for ALL external improvements made to your home (i.e., landscape, fence, deck, hot tub, paint colors, etc.) PRIOR to installation. It is important that this process be followed to ensure and promote design excellence in your community and prevent possible fine violations.

1. The initial Design Review Application must be completed and submitted directly to The District at the address or email address listed on the application.
2. The District will review all applications and forward the applications to the Design Review Committee (DRC) for final approval. The DRC will act upon the plans within 30 business days of receipt of a completed application packet.
3. The District will contact the homeowner in writing with the decision on the submitted application. If your improvement is not approved, you must resubmit with the necessary revisions (as indicated by the DRC) until you have received written approval from the DRC.
4. Once your improvement is completed, you may then submit the **Final Approval & Inspection Application**. Once submitted, the District will conduct an on-site inspection of the improvement.
5. Upon completion of the on-site inspection of the improvement, you will receive written notification of approval. They will also notify the District in writing.

Submittal Checklists

The following will assist the homeowner, management company and the DRC in having the best and most comprehensive information for review and will expedite the design review process. Provide as much information as you feel will portray your intentions and design of the improvement, when in doubt, add pictures or additional drawings.

See the Design Standards sections for more information regarding design parameters of each type of addition/improvement.

Painting

- Paint samples (chips or images)
- Explanation of paint colors (which colors go on body, trim, accent, etc.)

Deck/Patio/Spa

- All - Plan showing dimensions in relation to house, distance from property lines, and existing grading plan (including drainage swale if present and how design affects it)
- Deck - dimensions, material descriptions and drawings showing the extents, heights, and materials of the proposed deck.
- Deck - Image of area of the home if deck is above ground or covered.
- Patio – dimensions, description of materials
- Spa – show any screening elements in plan view as well as noting type, this may include pictures of home and materials.

Roofing

- Show image of existing roofing and propose roofing product.

Landscaping

- Plan view, preferably to a measurable scale showing site improvements with notes, meeting all of the requirements in the Landscape section of the Design Standards.
- Plan view dimensions of rock, mulch, and sod areas. Show existing and proposed walks, walls, and structures.
- List includes, but is not limited to, tree and shrub types and size.
- Describe and provide heights, lengths, and materials of walls, walks and patios.

Fencing

- Show fence and gate locations in plan view on the lot with notes about using the community approved fence shown in Appendix B.
- If requesting a fence variance, provide images or drawings of those fences and explain the reason for the alteration.

Patio Cover

- Show plan view of patio cover size, with dimensions, and details of window and door locations, existing or proposed patio edges.
- Provide image of portion of home where the patio cover will be located, simulated drawings of the patio cover are also acceptable to understand the configuration.
- Notes regarding column dimensions, colors, materials on roof, supports, etc.

┆ Addition

- Provide detailed plans and elevations of the addition, including noting materials, sizes, colors, etc. Simulated drawings are also acceptable.

┆ Other: Pet Enclosures

- Provide Plan view with dimensions showing location and size of enclosed area, including notes on materials.
- Provide images or drawings of fencing to be used.

┆ Other: Play Equipment

- Location map showing distance from closest property line.
- Image of proposed play structure, including notes about heights and colors.

┆ Other: Shed

- Plan view of yard with dimensioned location of shed.
- Drawings, images or simulations of the shed type, design, including colors and materials noted.
